00:37:59 Tyneal Chetty: Good day, Tyneal Chetty, JG Afrika

00:38:05 Shayna-Ann Cuthbertson: Hi everyone, Shayna-Ann Cuthbertson from WSP.

00:39:05 Amanda Fritz-Whyte: Good afternoon. Amanda Fritz-Whyte from PHS Consulting

00:39:27 Thandiwe Notshe: Good day, Thandi Notshe from SHE Partnership

00:45:17 Siphamandla Mzolo: Greetings everyone. Siphamandla Mzolo from Zutari.

00:59:55 Sue George: Please post your questions in the chat

01:07:17 Reinnie Ntokozo Maseko: Good afternoon everyone, Ntokozo Maseko from Geovicon Environmental

**01:09:38 Khuliso Mudau: Do we still consider backfilled pits as "aquifers" even though these have been geologically disturbed? i.e. the backfilled pit is either waste rock or overburden. But also understanding that there is potential for the groundwater to enter into the backfilled pits of vice versa through cut-off areas.**

01:12:16 Mitrance Nana Tchakounteu Epse Nana: Good afternoon, everyone, Sorelle Nana, EAP Independent consultant

01:17:01 Sikhumbuzo Dlamini: Yes

01:24:25 Sue George: Well done Barney!

01:43:33 Sue George: This has been an amazing presentation thanks Dr Morton. I wish you had been with us speaking at the National conference in Rustenburg in 2024.

01:44:52 Sue George: The NSTF STEM project was looking for inputs for the Mining 'tile' I would love to connect them with you if you are amenable.

01:45:24 Sue George: My question is what happens in the Zama Zama type situation

01:45:27 patricia nathaniel: Patricia Nathaniel from WSP

01:46:21 Lelani Claassen: Question regarding 'water-sharing', which is obviously a nice idea, but a legal challenge. wouldn't the Mine have to be a water services provider? Would any mining company want to go through that (I don't know how difficult or easy that may be). IF water from a mine is used for irrigation, and there is some health issue as a result, how would blame be assigned?

01:54:39 Lelani Claassen: There aren't many functional catchment management agencies in SA, though, are there?

01:55:30 Ken van Rooyen: I have a question in Q&A

02:06:33 Sue George: Thank you all for a very insightful event.

02:08:10 Dr Kim L Morton: The CMA's were designed to be participatory. I was part of the new National Water Act with Prof Kadar Asmal in 1994. There are two functional CMA's, the others need the catchment users to step up and make them work.

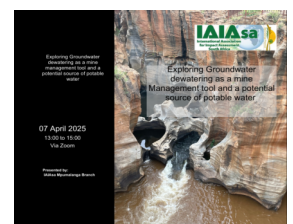

02:08:33 Paulette Jacobs: Thank you for a very interesting session. most insightful
